SUMMARY

This report presents the work done by Group 2 in response to the project brief for ELEN7046: Software Technologies and Techniques. The report will broadly focus on the following topics:

- The Methodology followed to execute the project;
- The Architecture of the solution developed for the project; and
- The different technologies used to deliver the solution.

June 11, 2016

Contents

1	Introduction	2
1.1	Literature Review	2
2	Stakeholder Concerns - Big Data	2
2.1	Collection	2
2.2	Processing	2
2.3	Visualization	2
3	Methodology	2
4	Assumptions and Constraints	2
4.1	Tweet Locations	2
4.2	Pros and Cons determinations	2
5	Success Criteria	3
6	Architecture of the Solution	3
6.1	High Level Design: Component Architecture	3
6.2	Detailed Design: Class Diagrams	3
6.3	Operational Model: Infrastructure Design	3
7	Conclusion	3
7.1	Control Situation	3

1 Introduction

TBC

1.1 Literature Review

2 Stakeholder Concerns - Big Data

2.1 Collection

2.2 Processing

2.3 Visualization

3 Methodology

In order for group two to successfully deliver this project, a development methodology based on IBM Rational Unified Process (RUP) was followed albeit tailored to cater for the specific needs of this project.

The diagram below depicts the IBM RUP model:

Figure 1: IBM Rational Unified Process (Source: IBM Systems Sciences Institute)

4 Assumptions and Constraints

4.1 Tweet Locations

The group has encountered a tweet location issues.

4.2 Pros and Cons determinations

Rudimentary algorithm for determining Twitter statements (tweets) that are against or for a particular candidate was adopted...

5 Success Criteria

6 Architecture of the Solution

6.1 High Level Design: Component Architecture

6.2 Detailed Design: Class Diagrams

6.3 Operational Model: Infrastructure Design

- **Personnel Shortfall:** Inexperience in the management team is a potential risk, due to the possible oversight and inaccuracies . Leach does not have sufficient IS Management experience(*pg 502 paragraph 4*), the project may suffer if leach continues at his current position

7 Conclusion

7.1 Control Situation

Before we come to a conclusion and define the proposed actions we must first define the archetypical control situation. Based on..
